2018 Sino-US Research Conference on Quality, Analytics, and Innovations

May 27-29, 2018, Xi'an, China

Conference Website: <http://sino-us-2018.scievent.com/>

Introduction

Quality has become one of major themes for modern industries to achieve competitive advantages in the 21st century global market competition. The emphasis on Quality in industrial applications is being leveraged to a level higher than ever, thus giving researchers more opportunities and challenges. Innovation is the best solution to tackle raising challenges. Rapid advancements of sensing and communication technology promote the new development of Analytics to link Quality and Innovations, and enable the next-generation practices in industry and innovations in academic research.

This conference aims to bring researchers from US and China together, create a platform for sharing cutting-edge research fruits and promoting scholarly collaborations. This Conference constitutes a forum for engineers and scientists to exchange and disseminate knowledge and discoveries in quality, analytics and innovations, and therefore increases the broader impact on economic development of both countries. Following the success of the 1st conference in 2016 (Shanghai), 2nd conference in 2017 (Beijing), the 3rd Sino-US Research Conference on Quality, Analytics and Innovations will be held at Scientific Innovation Building of Northwestern Polytechnical University in Xi'an during May 27-29, 2018.
